- Product Carnival

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 14+ years of progressive experience in managing enterprise-grade web applications for financial institutions and cloud contact-center platforms. Deep expertise spanning UI/front-end (HTML, React), back-end microservices (.NET Core, C#), cloud infrastructure (AWS, Azure), and mainframe integration — consistently delivering scalable, secure, ADA-compliant solutions across the full SDLC in Agile/SAFe environments. Adept at client engagement, technical mentorship, cross-team collaboration, and driving on-time delivery under tight deadlines.

WORK EXPERIENCE

NiCE Interactive System - Pune	
Specialist Software Engineer	May 2022 – Till Present

Digital Experience Email (DXE) Platform —

C# .NET Core | AWS (SES, Lambda, EKS, S3, SQS, SNS) | Kubernetes | Grafana

- Designed and maintained C#/.NET microservices & AWS Lambdas across ~70 repositories — covering inbound routing, outbound delivery, MIME construction, OAuth-based SMTP (MS Graph API), and SES bounce/complaint processing. System processes ~100K emails/hour across 10 AWS regions.
- Built and enhanced full **inbound** pipeline (SES → S3 → SNS → SQS → ingress → routing → skills-lambda → VC/DFO) and **outbound** pipeline (VC/DFO → outbound-api → SQS → egress → send-email-api → SES) ensuring 1M emails/day throughput target.
- Led 2 migration workstreams: FileServer → Cloud Storage, CloudWatch → Grafana LGTM observability — reducing operational overhead ~30%.
- Performed production incident triage, RCA; authored runbooks, alert playbooks, Grafana dashboards (structured event IDs, CloudWatch panels) — improving MTTR.
- Collaborated with Platform (VC monolith), DFO (Digital Prague), and DevOps teams across geographies on cross-system integrations
- Enforced secure-by-default: SSM-managed secrets, GDPR-compliant email retention/deletion, zero hardcoded credentials.
- Built the **inbound/outbound email blacklist** feature — UI for blacklist domain management, role-based access control, and integration with the management-api to block unwanted senders/recipients globally
- Designed and delivered the Reply-to address configuration capability end-to-end — new "Edit Channel" UI in integration box, full CRUD endpoints in channels-email-management-api, RDS schema changes, and inbound logic that resolves the reply-to address from MyGlobal DB and rewrites the Reply-To header during inbound processing

CERTIFICATIONS

- MCTS — .NET 4 (Microsoft)
- MS .NET Application Dev Foundation
- AZ-900 Azure Fundamentals
- SAFe Agile Team Member (2015 – Present)
- Full Stack Bootcamp React, Node, MongoDB (Udemy 2020)
- Anthropic Claude

EDUCATION

MCA — Master of Computer Applications

SPPU, Pune • 2007–2010
First Class

B.Sc. — Bachelor of Science

SPPU, Pune • 2004–2007
First Class

AWARDS

- Shining Star — Q4 2017
- Employee of Month July 2011
- Employee of Month April 2012
- "Living Proof" client recognitions — EPG

Customer Chat Platform (CXone) —

React | JavaScript | C# .Net | SSMS | CXone Studio

- Delivered Basic Chat integration for CXone (Central & User Hub) with customizable widget, pre-chat form, queue management, and transcript download/email — both V1 (popup) and V2 (embedded).
- Implemented SSL/TLS encryption and JavaScript API for dynamic chat customization; enabled third-party integrations via CXone Studio scripts.
- Fixed HTML injection vulnerabilities in Patron Chat transcript PDF and chat-transcript email exports
- Created and stabilized the DO-34 development cluster and deployed all CXone components onto it

SAFe Agile Practice: Regularly led daily stand-ups, sprint planning, and backlog grooming within the Scaled Agile Framework. Served as Scrum Master driving team velocity improvements.

Fiserv India Pvt. Ltd., Pune
Tech Analyst → Tech Lead

Nov 2013 – April 2022

Bill Pay RXP — Electronic Billing & Payment Platform —

HTML, Razor View | ASP.NET MVC | C# | REST API | jQuery

- Led end-to-end front-end development for next-gen Bill Pay (RXP) platform serving 1M+ internet banking subscribers — enabling online bill payments to managed/unmanaged merchants, social token payments (email/mobile), recurring schedules, and auto e-Bill payments.
- Drove ADA/WCAG 2.1 compliance using JAWS, WAVE, AXE — resolved 100% of critical accessibility violations; also conducted Visual Studio Code Analysis and performance tuning via Fiddler, HttpFox, and browser DevTools.
- Directly engaged with banking clients to resolve integration issues; distinguished technical vs. functional problems, reducing escalation turnaround time.
- Enforced OWASP secure coding standards via TFS code reviews — eliminated XSS and SQL injection vulnerabilities; applied Factory, Abstract Factory, and Dependency Injection design patterns.
- Conducted department-level technical training sessions; mentored junior developers on coding/owasp best practices, Agile delivery, and code quality standards.

Thinkinghut IT Solutions, Pune
Software Engineer

May 2022 – Nov 2013

Key Projects (condensed — oldest org):

- **Factor Freight Solutions:** Built web-based freight invoice validation system (ASP.NET MVC) replacing Excel-based tools; implemented configurable rules engine for multi-client invoice accuracy and scalability.
- **groMoney (US Stock Market App):** Developed portfolio tracking features with Facebook OAuth, S&P/Dow Jones benchmarking, group investment tools, and dynamic jqPlot bar/pie chart visualizations.
- **Anzu Medical (e-Commerce):** Built iPad-based e-book purchasing platform with breadcrumb navigation, advanced search by category, subscription model, and cart/payment workflow.
